

EarthingNuts™

Product description

Brass EarthingNuts™ replaces the traditional “banjo” earth-tag and lock-nut for earthing brass cable glands. No extra drilling required – saving up to 60% on fitting times than conventional methods as does not compromise the enclosure IP rating.

SWA Part No.	To Suit Thread Size (mm)	Pack Qty
BELN20-PK2	20	2
BELN20-PK10	20	10
BELN25-PK2	25	2

Supplied with grub screws, connecting bolt and Allen key

Key features

- Reliable earthing with plastic and metal enclosures.
- Improved safety during fitting and service.
- Unique cutting teeth bite into the box wall so that the gland can be tightened with just one tool from the outside.
- Teeth provide voltage equalising connection to EMI shielding.
- Enables a direct high integrity connection for protective earthing.
- Designed to resist vibration.

Patented in the UK and Ireland (No. EP1790053) Other international patents granted and pending.
